

Setting Up a Website

You will need a simple website to introduce your company and your services. It does not have to be fancy, but should offer information about:

1. Your company and its sales policies/procedures
2. Frequently asked questions (FAQ)
3. How to contact you
4. Shopping cart if you plan on website sales

Building a website is not hard at all, in fact I am going to recommend that you use the same web hosting company as I do. [Hostgator](#) offers a step-by-step, user friendly service for those who have no web building experience. From purchasing a domain name to setting up your website the process will take a couple of hours.

The cost associated with having a website is no more than \$9.95 per month if you choose to pay monthly. If you pre-pay a year in advance your cost will go down to approximately \$7.95 per month. I will even give you a coupon code to make your first month's payment one penny! (.01)

I will walk you through the steps to get your website up and running today, in fact if you [click on this link](#), your browser will open another window and we can go through the steps together.

1. Once at the Hostgator website click on “Hosting”

The screenshot shows the Hostgator website homepage. At the top left is the Hostgator logo featuring a blue and yellow gator with the tagline "we eat up the competition". To the right of the logo, contact information is provided: Toll Free: 1.866.96.GATOR and Local: 1.713.574.5287, with a note "Now hosting over 1,300,000 domains!". A small inset image of a woman with a headset is labeled "NOW ONLINE". Below the header is a navigation menu with links for HOME, WEB HOSTING, RESELLER HOSTING, DEDICATED SERVERS, SUPPORT, ORDER NOW, and AFFILIATES. The main content area features three promotional cards for different hosting services, each with an image of server racks, pricing, features, and an "ORDER NOW!" button.
